Low-Lying Fog Where You Want It When You Want it

ultratec special effects®

The Floor Pocket creates an impressive instant fog effect. Whether using a single pocket or a multiple floor pocket set-up, the floor pocket allows you to push low fog where and when you need it. To maximize the effect, the floor pocket should be paired with our Eclipse Low Fog Generator.

The Floor Pocket is pneumatically operated and can be safely implemented into the stage set-up mounting flush to the floor. Whether using a single pocket or a multiple floor pocket set-up, the Floor Pocket allows you to discreetly cover a stage in low-lying fog. Using the Round Floor Pocket Shield (removable) provides directional control and a more focused low fog effect. This effect has been successfully utilized on cruise ships, casinos, theme parks and stages around the world.

The Floor Pocket is ideal for large stage set-ups pushing low fog where you want it for live theatre and concert events.
