

The Radiance Touring System. Our Original Hazer Touring System.

The Radiance Hazer can cost as little as \$1 per hour to operate.

The Radiance Touring System is our original hazer touring system for events in large arenas. Packaged in a durable wheeled road case, it includes the Radiance Hazer with its award winning 4-Port Rapid Vaporizer. A major advancement in water-based haze technology, it costs as little as \$1 per hour to operate.

The Radiance Hazer can be operated via stand alone operation, optional remote control or built-in 2 channel DMX that controls haze output and the internal fan. The Versa Fan is controlled using built-in DMX with RDM capability. Using the support tray, the fan easily slides out of the road case. After using the heavy-duty angle adjustment to set the position, push haze up to 1,000 cubic feet per minute.

Luminous 7 Haze Fluid should be used with the Radiance Touring System. With an extremely long hang time, it produces a beautiful haze and using it maintains your five-year warranty against manufacturer's defect.
