

Create Excitement with Instant Jet Blasts

ICEJET^{III} COMBO

The Ice Jet III is an atmospheric effect that creates an instant jet burst of white dense plumes resembling fog. High pressure and low pressure liquid CO₂ can be used depending on the desired effect. Simple and straightforward, the Ice Jet III can be operated individually or synchronized with other Ice Jet III's to blast instant excitement into any live event.

Easy positioning allows the user to manually adjust the funnel, pushing CO₂ blasts out at any angle. Mounting holes in the base allow it to be secured to the floor or use the optional truss clamp to hang it from the truss. The Ice Jet III can be purchased in our most popular Combo Value Kit, which includes the Ice Jet Hose 20', CO₂ Adapter CGA 622 Female > CGA 320 Male and the CGA CO₂ Dewar Tank Fitting 3/8" Kit.

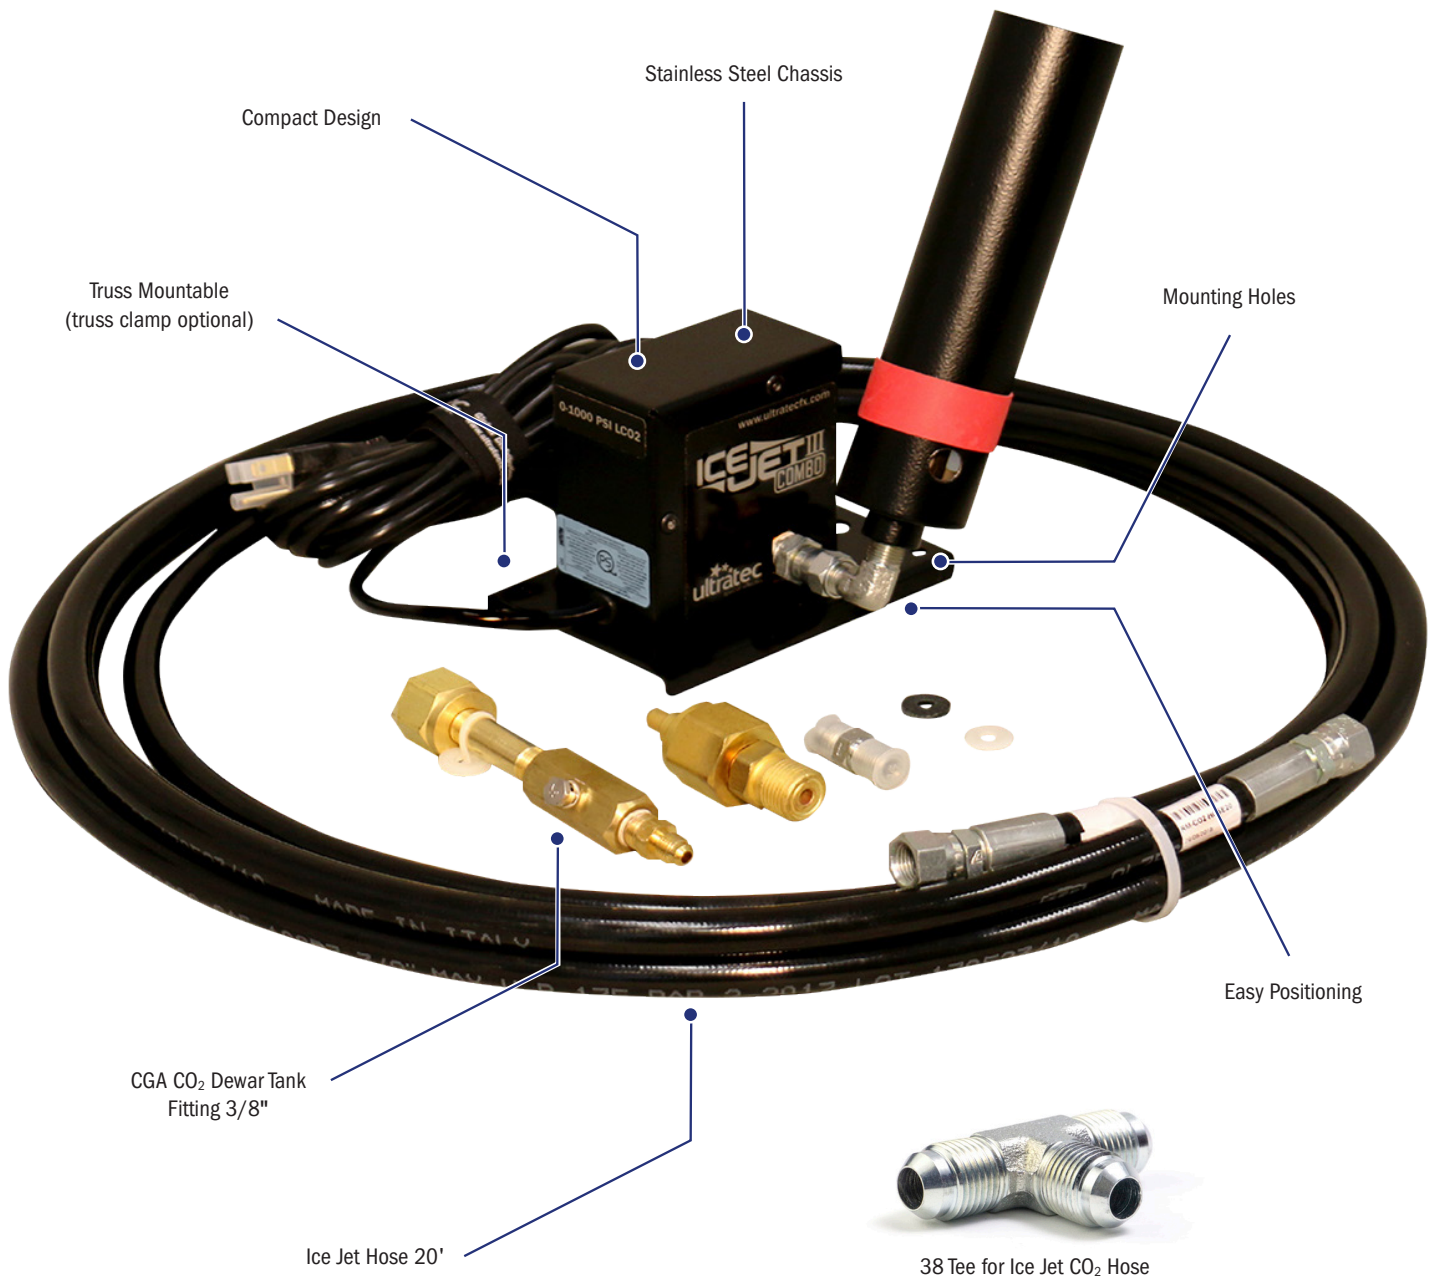

Designed to bring instant excitement to an entrance for concerts and sporting events. The Ice Jet III's blasts can be synchronized with those key moments, providing that extra punch to any live event.
